Dear Jackie,

Thank you for your submission.

Having considered the study as described in this application then I can confirm that PBPP permission is not required to proceed with this work.

It is understood that data collection occurs following patient and staff consent and there is no access to personal information by anyone outside the direct care team prior to this consent being obtained. There is no follow up via administrative records but only through case notes.

Please refer to the Terms of Reference available on the website for further information on the scope of the Panel when consent has been sought for the purposes of a clinical study.

Note the applicant should ensure that all other governance permissions such as R&D and NHS ethics have been granted prior to commencing data collection at local sites.

If you have any further queries then let me know.

Best wishes  
Ashley
